

The E-Series is coming to BTME

Dennis and SISIS will be introducing their new and exciting range of environmentally friendly turf maintenance machinery to the golf market at BTME 2022.

Working alongside carefully selected partners Dennis and SISIS have developed a portfolio of machines that have great battery life and range, with ultra-low noise and vibration, that are a NO COMPROMISE alternative to the petrol range they have been renowned for producing. The investment and research have paid off and the E-Series boasts a range of superior battery-powered products that are befitting of the Dennis and SISIS badges.

Located in the Red Zone on Stand 244, visitors can expect to see the following products on display.

ES-26

Easy to use, superb balance, control, and easy pull back for accurate alignment of next run are just some of the features of the ES-26. With a 26" cutting width, this mower is available with a standard front roller for maintaining fine turf sports surfaces such as golf greens and tees.

ES-22 Ultra

Quiet in operation with ultra-low hand arm vibration, the ES-22 Ultra can help professionals enhance a playing surface. Very simple to control, variable speeds and clip rates, forward speeds controlled by the operator and easy pull back for accurate alignment of next run. Using a 7 or 11 bladed cutting cylinder and groomer reel, this 560mm (22") battery mower provides an ultra-fine finish on golf greens and tees. The tungsten tipped groomer can be in or out dependent on conditions.

ES-MK5

The ES-MK5 offers the industry a dedicated battery scarifier that has great battery life and range with ultra-low noise and vibration. It boasts a power output that allows the tough tasks of scarification to be completed without range anxiety.

It is a well-built, reliable machine that is operator friendly, and easy to control which ensures many years of service that helps end users dramatically reduce carbon emissions, maximise output and save money on fuel.

SISIS Flexibrush

The SISIS Flexibrush is a tractor mounted brush which is equally effective dispersing top dressing and removing excess material on natural turf surfaces. It has a 5.35 metre working width, its brush sections 'float' to follow ground contours and the outer sections fold for transport and storage. Over the years, many greenkeepers have relied on the Flexibrush for

a wide range of tasks including presenting and striping fairways when it is too wet to cut; standing grasses up before cutting to provide a better finish; dispersing worm casts and knocking dew off the surface.

Dennis & SISIS have been regular exhibitors at BTME for a number of years and as always, the company's experienced staff will be available to answer any queries and offer valuable advice about the machinery on show.
