

## PRESS RELEASE

### **Stand 624 to showcase the epitome of Japanese excellence as Baroness and Kubota team up at BTME 2024**

Stand 624 at BTME 2024 is set to be a platform for Japanese excellence as Baroness and Kubota team up once again to showcase a vast array of equipment solutions critical to successful fine turf maintenance. Particular highlights are set to include the all-hydraulic LM311 Baroness greens and tees mower and the Kubota FC out-front centre-collect mower – both designed to deliver uncompromising performance, efficiency and outstanding versatility.

Featuring the superior cutting performance and comfort synonymous with the Baroness brand, the LM311 all-hydraulic triplex mower delivers precision for cutting tasks around the golf course. At its heart is an economic 17hp Kubota diesel engine, providing reliability in performance and powering the precision demanded to deliver pristine greens and tees.

Beside the LM311 will be the new LM351 four-wheel drive triplex mower which features 'series circuit drive system', enabling a smaller turning radius and superior climbing performance – making the LM351 ideal for the mowing of banks and surrounds. On show in Harrogate for the first time, the LM351 will be joined by other Baroness products including the FS900 core collector and a selection of rollers from the AgriMetal range.

For Kubota, the highly productive FC3 and FC4 out-front centre-collect mower range will be making a popular return. The FC3-261, and larger FC4-501, feature a high-capacity hopper and 'floating' out-front flail deck which promises to conform to undulating ground, offering an effective solution to cut and collect tasks around the golf course including rough and heather management.

Innovation will be visible across the Kubota portfolio, in particular in the recent expansion of their electric offering – with both the LXe-261 electric compact tractor and Ze series of electric zero-turn mowers making their BTME debut. Combining high-quality cut performance with enhanced operator comfort through reduced noise and vibration levels, the Ze promises to be a productive and more environmentally-conscious choice, ideal for local authorities and contractors.

Visitors looking for further information on any of the Baroness and Kubota products are encouraged to speak with the technical teams, on hand on stand 624, across the three days.

ENDS

## **About Kubota Corporation**

Kubota has been a leading manufacturer of agricultural equipment, construction equipment, lawn mowers and industrial engines since 1890. With its global headquarters in Osaka, Japan, offices in more than 120 countries and more than 41,000 employees in North America, Europe and Asia, Kubota had a turnover of \$20 billion in 2021. Although agricultural, construction and turf equipment are its main product lines, Kubota also produces a wide range of products such as city water purification systems, irrigation systems, piping systems, roof and home construction, and large underground valves.

## **Our Mission**

Our mission "For Earth, For Life" speaks to our commitment to the conservation of the environment while aiding the production of food and water supplies, which are vital to meet the needs of our society, as the world's population continues to grow. This mission is accomplished every time a Kubota tractor harvests the land to produce food or when our construction equipment excavates to transport water or provide shelter.
