

## PRESS RELEASE

### **Dennis Mowers to Showcase Trusted Turfcare Solutions at BTME 2026**

Dennis Mowers, part of the Howardson Group, will be exhibiting at BTME 2026 in Harrogate, showcasing a selection of professional turf maintenance machinery designed to support the demands of modern golf course management.

Located on Stand 252, the Dennis team will present equipment trusted by golf course professionals for delivering consistent presentation, playability and long-term turf quality across greens, tees, surrounds and wider playing areas.

Drawing on more than a century of engineering expertise and shaped by feedback from turf professionals, Dennis machines combine long-standing design principles with modern electric technology with exceptional battery-life.

#### Product Highlights

##### ES-22 Ultra

The ES-22 Ultra is a premium battery-powered mower developed for the precise demands of golf course maintenance. Designed for greens, tees and fine turf areas, it delivers a smooth, ultra-fine finish where consistency and presentation are critical. Features include a tungsten-tipped groomer reel for improved surface preparation, ultra-quiet operation, low hand-arm vibration and rapid recharge capability, making it well suited to intensive daily use.

##### ES-510

The ES-510 offers flexibility for golf maintenance teams through its interchangeable cassette system, allowing multiple operations from a single power unit. Ideal for greens surrounds, approaches, tees and fine turf renovation work, it enables efficient switching between mowing, verticutting and brushing. Quiet operation and reduced running costs make it a practical electric alternative to petrol machines.

##### Gang Mowers

Dennis Gang Mowers provide an efficient solution for wide-area mowing on golf courses, including fairways, practice areas and larger turf expanses. Available in single, three or five-unit configurations, they are designed to deliver an even cut and consistent presentation, with robust construction for reliable performance over undulating ground.

## Expert Support at Stand 252

The Dennis team will be available throughout BTME 2026 to offer practical advice and discuss turfcare solutions tailored to individual course requirements.

For further information or to arrange a demonstration, contact Dennis on 01332 824 777 or visit [www.dennisuk.com](http://www.dennisuk.com).

## Notes to editors:

**Dennis:** Known for high-quality and versatility, Dennis produces high-precision walk-behind mowers and interchangeable cassette systems tailored for elite sports turf. Whether it's mowing, verticutting, de-thatching, or aeration, Dennis machines deliver professional results across a wide range of athletic surfaces, from rugby and football fields to baseball diamonds and training grounds. For larger areas such as polo fields, Dennis gang mowers provide wide cutting coverage with exacting finish quality.

Howardson Group is a family-owned British manufacturer based in Derby, serving professional and grassroots sport, contractors and local authorities through its SISIS, Hunter Grinders and Dennis brands.
