

Press release

ELECTRIC BTME FROM REESINK UK

Biggest range of electric machinery options on one stand

Reesink UK will bring its electric stars to BTME. From Toro, the ground-breaking first all-electric riding greensmower, the industry-leading electric utility vehicle and the new lithium-ion battery version of a classic pedestrian mower, as well as multiple electric carrier options from STAR EV, will all be on stand 420.

There's no question electric is the future of the industry and Toro has consistently led the way with the development required to get this technology to market. See the Toro Greensmaster eTriFlex 3370, the break-through everyone was waiting for, bringing no emissions, less noise and easier maintenance without any compromise on the quality of cut expected from a Toro riding greensmower.

The new electric Toro Greensmaster eFlex 1021 is the lithium-ion battery-powered version of the popular flex-head walk-behind Flex1021 greensmower. All the innovation of the original with patented proven Flex technology and popular telescoping handle, but powered by clean, green energy. It will be on stand alongside the Toro Workman GTXe utility vehicle, another machine with advanced lithium-ion battery technology and was hugely influential in Toro's journey towards battery power.

Continuing the electric theme with its extensive range of battery-powered golf buggies is STAR EV. The first time the brand has been represented at the show with its latest plug-in electric utility vehicle for the UK market, the Capella Work Machine and Capella 48-2-HCX, both are purposefully designed to help move people and equipment around quietly, safely and efficiently.

Toro irrigation will be well represented by Lynx Central Control system, famed for its easy, precise remote control access, and an extensive range of Toro sprinklers. Continuing the water theme are Concept 3 and Fractional lake and pond aerators from Otterbine and a two-wire Grower irrigation controller from SRC for simple wall-mounted control.

And there'll also be the first chance to see one of the newly redesigned and reimagined tractors from TYM. Part of TYM's major brand overhaul, the 37hp T395 has a new look, a Stage V compliant diesel engine and a raft of improvements for a more productive performance. It will be joined by the AgriMetal Blower attachment, which is the perfect attachment for winter debris maintenance work.

Stand 420 will be home to Toro electric machinery, Toro irrigation, Otterbine, SRC, STAR EV, TYM tractors and AgriMetal attachments – making it a must-have visit on your trip to Harrogate.

ENDS

Notes to editors: Reesink UK LTD is an official UK distributor for Toro professional turfcare machinery and irrigation products, Otterbine pond and lake aeration products and TYM Tractors for the golf, sport and amenity sectors. It is based at 1-3 Station Road, St Neots PE19 1QF. Call 01480 226800, email info@reesinkturfcare.co.uk, or visit reesinkturfcare.co.uk. Reesink UK LTD is authorised and regulated by the Financial Conduct Authority.
