

## Press Release

Acumen And ClearWater Are Back at BTME 2022!!

It started back in 1995 with Highspeed Group

The company planned to enter the turf maintenance sector, so BTME seemed the logical solution. Results from that first attendance 26 years ago exceeded expectations, generating excellent business.

Every year the company exhibited at BTME and on each occasion new customers were found. Over the years at BTME, many products and services, legislative driven, were introduced. Initially, waste management services were established with hundreds of golf clubs and others in turf management. Fuel and oil tanks were in great demand when new legislation was introduced, and a range of tanks were exhibited. Workwear and PPE followed but the biggest launch was that of the ClearWater wash pad water recycling system in January 2003.

Since Highspeed has been sold to Acumen Waste Services Limited, ClearWater has seen fantastic investment and growth. From 2017 it has gone from strength to strength with significant growth year on year, new engineers, and a larger dedicated customer care team.

Showcasing ClearWater at BTME is still as important now as it was 26 years ago! and with a year's absence due to the Pandemic the Prize Draw (a free ClearWater system) will run again along with attractive finance options!  
There's an expanded presence of waste management services too; Acumen's speciality!

We can't wait to welcome you all to the stand
